

OEM Refurbish Services

As the world leader in the manufacturing of large seamless steel pressure vessels, CP Industries recognizes the importance of providing repair and refurbish services to the industry today. From the simplest repair to the most complex, we provide a full breadth of advanced services to help pressure vessels achieve their maximum potential service life.

These services include visual inspection for both internal and external corrosion, replacement of components such as valves, "o" rings and safety devices, inspection of threads and re-threading as necessary, and re-painting. The CP Industries facility is equipped to bring your cylinders or cylinder assemblies back to like-new condition, always with safety in mind.

- Old units dropped at CPI
- Frames and tubes are grit blasted
- UT performed to verify wall thickness
- Fresh coat of paint is applied
- Units are re-assembled with all new components
- Complete array of tests and inspections as performed at the time of manufacture is also available

A worldwide supplier of superior products and exceptional customer service, since 1897
